Professional Summary

Frontend Developer with 3+ years of experience building responsive, accessible, and high-performance web applications using React.js, Next.js, TypeScript, JavaScript, HTML5, and CSS3. Skilled in developing reusable UI components, integrating REST APIs, implementing micro frontend architectures, backend proxy integration, managing application state with Redux Toolkit and Context API, and optimizing frontend performance through code splitting, lazy loading, and Lighthouse improvements. Experienced in responsive design, authentication, role-based access control, SEO, testing, CI/CD, and deployment workflows using GitHub Actions and Firebase.

Core Competencies

React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Shadcn UI, Material UI, Redux Toolkit, Context API, Micro Frontend Architecture (Module Federation), Backend Proxy Integration, REST API Integration, Axios, Responsive Web Design, Cross-Browser Compatibility, Reusable Components, State Management, Performance Optimization, Code Splitting, Lazy Loading, Accessibility (a11y), SEO, Jest, React Testing Library, Lighthouse, Git, GitHub Actions, Firebase, CI/CD, Agile Development

Technical Skills

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS, Python, SQL

Frameworks & Libraries: React.js, Next.js, Angular, Preact.js

Architecture: Micro Frontend (Module Federation), Monorepo, Backend Proxy Integration

State Management & APIs: Redux Toolkit, Context API, REST APIs, Axios

UI/UX: Tailwind CSS, Shadcn UI, Material UI, Responsive Design, Accessibility, SEO

Tools & Testing: Vite, Webpack, Jest, React Testing Library, Lighthouse, Git, GitHub Actions, Firebase, CI/CD

Professional Experience

React Developer | [BridgeFix Technology Private Limited, Indore, India](#) | Sep 2025 – Present

- Developed a hospital management system using React.js, TypeScript, HTML5, CSS3, and REST API integration to support 1,000+ monthly appointment requests.
- Implemented JWT authentication and role-based access control (RBAC) for secure access management across multiple user roles and protected healthcare workflows.
- Built dashboard interfaces and responsive frontend modules that reduced staff administrative effort by 25% and improved usability for daily operations.
- Collaborated with backend services built with Flask and Azure Service Bus to support reliable real-time communication and fault-tolerant data synchronization.

Frontend Developer | [ExpertInAsia Private Limited, Indore, India](#) | Jul 2022 – Aug 2025

- Built and maintained high-traffic web applications using React.js, Next.js, TypeScript, and Vite, improving Lighthouse performance scores by 35% through code splitting, lazy loading, image optimization, and bundle-size reduction.
- Architected and implemented Micro Frontend solutions using Webpack Module Federation, enabling independent deployment of feature teams and reducing inter-team coupling across large-scale applications.
- Designed and integrated backend proxy layers to abstract API complexity, enforce security boundaries, and improve frontend-backend communication reliability across distributed services.
- Developed reusable and responsive UI components using Tailwind CSS and Shadcn UI, accelerating feature delivery by 30% and improving design consistency across multiple application modules.
- Implemented centralized state management using Redux Toolkit and Context API, reducing UI response time to sub-100ms and improving data consistency across 50+ views.
- Integrated REST APIs and optimized frontend data flows for scalable application performance and reliable user experiences.

- Automated deployment workflows using GitHub Actions and Firebase, supporting CI/CD processes and maintaining a 99.9% build success rate.

Freelance Frontend Developer | **Self-Employed (Remote)** | Feb 2022 – Mar 2024

- Delivered end-to-end frontend solutions for clients across e-commerce, education, and service sectors using React.js, JavaScript, HTML5, and CSS3.
- Built responsive, mobile-first web applications and landing pages from client briefs, ensuring cross-browser compatibility and performance optimization.
- Integrated third-party APIs and payment gateways into client applications, improving user workflows and overall product functionality.
- Managed complete project lifecycles independently — from requirements gathering and UI design to development, testing, and deployment — ensuring on-time delivery.
- Collaborated with clients remotely to refine requirements and iterate rapidly on feedback, maintaining high client satisfaction across multiple concurrent projects.

Technical Projects

DeftRank | *Real-Time Evaluation Platform*

- Built a real-time student ranking dashboard using Preact.js, Firebase, JavaScript, HTML5, and CSS3, reducing bundle size by 60% compared to a standard React implementation.
- Implemented real-time data synchronization and performance-focused rendering, improving DOM interaction speed by 40% and enhancing user experience.
- Added unit testing with Jest and achieved 90%+ code coverage for core ranking logic.

Ilollo Learn | *Global EdTech Platform*

- Developed a multilingual education platform using Angular, JavaScript, MySQL, HTML5, and CSS3 with i18n support for users across 3+ regions.
- Improved SEO through semantic HTML, metadata optimization, and structured frontend content, increasing platform discoverability.
- Designed responsive, mobile-first interfaces using CSS Grid and Flexbox while maintaining accessibility best practices.

Education

Master of Computer Applications (MCA) — Rajiv Gandhi Proudtyogiki Vishwavidyalaya | CGPA: 7.6/10

Bachelor of Computer Applications (BCA) — Makhanlal Chaturvedi National University | CGPA: 7.8/10
